All Beaux-Artes filter grilles are a combination of a standard filter grille door set, with a Beaux-Artes decorative grille. Price includes removing the louvers, cutting the decorative grille to exact size of door, and attaching the grille to the door using machine screws from the back so they do not show when the filter grille door is closed. Price also includes two pieces of black mesh cut to size. The black mesh has the visual effect of turning your pick, blue or white filter pitch black. Also included are four pieces of trim kit molding that fits around and over the hard edge of the stationary wall part of the standard filter grille door set. Molding easily glues to wall with adhesive provided. All screws, nails and adhesive are provided to make for an E-Z home installation. Estimated time to install 20 minutes.
